

With Ellen Singh

Kindermusik Playdates are:

- 35 – 45 minutes long
- Theme-based single classes
- A great introduction to the Kindermusik experience
- Pre-registration required with a small fee due at registration
- At-home materials supplied to each participating family

What a Parent and Child Will Experience in Class

For babies, toddlers, and preschool children with their parents, a playdate class provides a delightful environment unlike any other. Through a unique blend of multi-age activities that include creative movement, vocal play, object and instrument exploration, and a colorful literature component, a playdate offers all the benefits of a regular Kindermusik class. Designed for a wide variety of ages and abilities, all families will enjoy these activities!

Variety of Music

Musical diversity builds strong neural networks in the brains of all children. Kindermusik classes use music featuring a wide variety of styles, sounds, and genres.

Instrument Play

Age-appropriate experiences with child-safe instruments enhance a sense of rhythm and steady beat. Children will develop a keen awareness of the distinguishing qualities of sound, and the class experience will encourage spontaneity and creativity.

Dance

A classroom full of children and their adults get a chance to get moving. Dancing together helps a little body develop the muscle strength needed to crawl and walk, introduces social skills in a fun way for toddlers, and challenges preschoolers to remember steps in sequencing. It is great for all of us to let loose and let the music move us. Dancing helps us all to fall in love with the simple joy of responding to music.

Together Time

A Kindermusik class is truly the essence of quality time, offering parents and other caregivers a place to create special memories with their child/ren. Caregivers will also gain new insights into their child's development and ways to nurture a natural love of music in their family.

Expert Advice

A Kindermusik Educator explains each activity and how it enhances a child's complete development. Caregivers are also shown what cues to watch for and ways to promote their child's growth.

Learning Continues at Home

With the Home Materials, the learning continues at home with the child's best teacher—the parent!
